

## ABOUT EMPOLIS

Empolis, an Attensity Group Company, provides an integrated suite of business applications that analyze, interpret and automate the exploding volume of unstructured data. Business leaders, knowledge management professionals, customer support personnel and customers receive current knowledge and get relevant and actionable answers – fast.

Three business intelligence and information management companies – Empolis GmbH (Gütersloh), Living-e (Karlsruhe) and Attensity Coporation (Palo Alto, CA, USA) – combine state-of-the-art technology and decades of know-how creating a next-generation international software company that can help shape the new market for semantic processing of unstructured information (emails, documents, graphics). Companies and organizations using semantic information technologies to analyze and automatically and efficiently process their unstructured data stand to experience a quantum leap in their productivity.

Empolis is the provider of intelligent information management applications for companies and organizations who have recognized the great value for their company. Information in all varieties of formats and from any source are automatically transformed into valuable knowledge and delivered in real-time to the decision-maker. Information is converted into real knowledge capital and business processes are optimized.

Countless notable national and international enterprises, as well as public organizations rely upon Empolis applications and our 20+ year experience in a wide range of industries and process know-how. Internationally, more than 10,000 business leaders and users in 250 “Fortune 1000” companies utilize applications from the Attensity Group.

Empolis is the driving force in the development of innovative products and industry standards, thus we act and think ahead for the benefit of our customers. We are actively involved in national and international research and development projects and coordinate the THESEUS consortium that develops basic technologies and standards for a new, internet-based knowledge infrastructure.

Empolis is member of the German Research Center for Artificial Intelligence (DFKI) and is represented on the board of trustees with the Fraunhofer Institute for Intelligent Analysis and Information Systems (IAIS).
